# Workwear

Our company have a wide selection of fabrics suitable for most services . These extensively tested and durable fabrics offer outstanding breathability to provide the wearer with ease of movement and comfort, allowing them to complete their jobs safely and to the best of their ability.

A fabric made up of a 100% cotton, tough and durable and ensures 100% breathability.

An EN approved fabric made up of 100% cotton twill weave ultra-cool flame retardant fabric.

This is a flame retardant It is comfortable, durable and flexible, and provides all the protection required

Permanent Flame Retardant fabric made up of a 100% cotton Twill weave. Being a 100% cotton, the fabric ensures breathability and comfort.

Most of our garments have reflective tape and approved

## WORKWEAR FEATURES

Most of our garments are fitted with a pen division for this exact reason, allowing workers to easily access and store their pen as they go about their day.

A bar tack is a series of close, zigzag stitches used to reinforce areas of stress on garments, such as pocket openings, bottom of a fly opening or button holes. This quality feature adds extra durability to our garments.

On most of our garments we use triple stitching on all stress bearing seams to ensure our garments have an added life span.

We use high quality of zippers, on all of our garments to extend life span.

An adjustable cuff is an optional feature for extra comfort which allows the cuff to be adjusted to the individual wearer's size.

We offer reflective tape on most of our garments.

The edges of the button holes are covered with a knot to "gimp" the buttonholes which gives garments superior strength.

We use double stitched seams on our garment pockets to ensure the garment is durable and has an extended life span.

We have a range of garments which have added knee padding to keep the wearer safe in rocking environments.
